CTU's placement determination practices for the 2010-2011 employment rates are currently under review and CTU will provide additional information regarding its 2010-2011 employment rates, as appropriate.

The data provided above is intended to provide information about the number of students who have graduated and/or obtained employment in their field of study or in a related field after graduating from a particular type of academic program. Because the programs may be offered at one or more of the campuses listed above, the rates do not and cannot reflect the employment rate or graduation rate for a specific academic program at a specific campus. For this reason, and the fact that these rates are based on historical data, students should not rely on these rates as an implicit or explicit representation or promise of future outcomes or employability following completion of a program of study. Indeed, there are numerous factors that affect a student's ability to graduate and secure employment over which the school has little or no control. Therefore, the school cannot and does not guarantee or estimate the likelihood of on-time completion, graduation, or employment for any student.

\* This program did not begin providing instruction or did not enroll any first-time, full-time undergraduate students during the graduation rate date range referenced above.

\*\*This program is no longer offered or did not have graduates during the on-time completion rate date range referenced above.

## Frequently Asked Questions

### ON-TIME COMPLETION RATES

#### 1. Who is considered a completed student?

A completed student has completed the graduation requirements for their program and is classified as a graduate of the school.

#### 2. How are On-Time Completion Rates calculated?

These rates are calculated using the gainful employment formula in order to comply with U.S. Department of Education requirements. The statistics track all students who completed their program within the date range noted above and have reached completion within the program's normal time period. Students who transfer into or change programs are not allowed extra time for the purpose of this calculation. For example, for a two-year program, the on-time completion rate would include all completed students who had started their program at this school two years prior. A student who changed programs will not be classified as "on-time completed" unless they reach completion within the normal time period for the program they have graduated from.

## Frequently Asked Questions

### **GRADUATION RATES**

#### **1. Who is a first-time student?**

A first-time student has no prior postsecondary experience before enrolling at this campus. This means that a student who attended another college, university or other postsecondary school before enrolling at this school is not included in the calculation. The rate also does not include students initially enrolled part-time, taking individual classes (as compared to enrolling in a full program), or only auditing classes.

#### **2. How are Graduation Rates calculated?**

These rates are calculated using the Student Right-to-Know formula in order to comply with U.S. Department of Education requirements. The statistics track all first-time, full-time and certificate or degree-seeking undergraduate students who began school during the date range noted above and have completed within 150% of the normal program length. For example, for a two-year program, the graduation rate would include students who had completed within three years of beginning the program. Information pertaining to the Graduation Rates of all postsecondary institutions recognized by the U.S. Department of Education may be found on the College Navigator website.
