* This program did not begin providing instruction or did not enroll any first-time, full-time undergraduate students during the graduation rate date range referenced above.

**This program is no longer offered or did not have graduates during the on-time completion rate date range referenced above.

Frequently Asked Questions

ON-TIME COMPLETION RATES

1. Who is considered a completed student?

A completed student has completed the graduation requirements for their program and is classified as a graduate of the school.

2. How are On-Time Completion Rates calculated?

These rates are calculated using the gainful employment formula in order to comply with U.S. Department of Education requirements. The statistics track all students who completed their program within the date range noted above and have reached completion within the program's normal time period. Students who transfer into or change programs are not allowed extra time for the purpose of this calculation. For example, for a two-year program, the on-time completion rate would include all completed students who had started their program at this school two years prior. A student who changed programs will not be classified as "on-time completed" unless they reach completion within the normal time period for the program they have graduated from.

Frequently Asked Questions

GRADUATION RATES

1. Who is a first-time student?

A first-time student has no prior postsecondary experience before enrolling at this campus. This means that a student who attended another college, university or other postsecondary school before enrolling at this school is not included in the calculation. The rate also does not include students initially enrolled part-time, taking individual classes (as compared to enrolling in a full program), or only auditing classes.

2. How are Graduation Rates calculated?

These rates are calculated using the Student Right-to-Know formula in order to comply with U.S. Department of Education requirements. The statistics track all first-time, full-time and certificate or degree-seeking undergraduate students who began school during the date range noted above and have completed within 150% of the normal program length. For example, for a two-year program, the graduation rate would include students who had completed within three years of beginning the program. Information pertaining to the Graduation Rates of all postsecondary institutions recognized by the U.S. Department of Education may be found on the College Navigator website.

Employment Rates

Campus: Colorado Technical University - North Kansas City

The rates provided in this document are intended to provide information on the number of students who have obtained employment in their field of study or in a related field after graduating from a specific academic program at this particular campus. The rates differ because the methods of compiling, calculating and reporting employment rates vary depending on the regulatory agency or institution. A summary of the calculation methodology for each of the rates calculated below is included in this document for your reference.

The rates disclosed below reflect historical outcomes and should not be relied on by anyone as an implicit or explicit representation or promise of future outcomes or employability for any student following completion of a program of study. Numerous individual and market factors affect a graduate's ability to secure employment in his/her field or in a related field after graduation, and the school has little or no control over many of these factors. Therefore, the school cannot and does not guarantee employment or estimate the likelihood of securing employment upon graduation for any student.

Accrediting Bureau of Health Education Schools (ABHES)

ABHES is recognized by the United States Secretary of Education for the accreditation of private, postsecondary institutions in the United States offering predominantly allied health education programs and the programmatic accreditation of medical assistant, medical laboratory technician and surgical technology programs leading to a certificate, diploma, Associate of Applied Science, Associate of Occupational Science, or academic associate degrees and programs offered by distance delivery.

Reporting period: July 1, 2010 through June 30, 2011

Employment Rate Calculation:

$$(F + R)/(G-U)=P\%$$

F = Graduates placed in their field of training

R = Graduates placed in a related field of training

G = Total graduates

U = Graduates unavailable for placement (health-related issues, military obligations, or continuing education status)

P% = Placement percentage

CAAHEP – Accreditation Review Council on Education in Surgical Technology and Surgical Assisting (ARC-STSA)

The mission of the Accreditation Review Council on Education in Surgical Technology and Surgical Assisting is to provide recognition for the quality of the education programs in its system to the public. The ARC/STSA is the only CAAHEP-recognized Committee on Accreditation for education programs in surgical technology and surgical assisting.

The ARC/STSA threshold for Graduate Placement is 80%.

Reporting Period: August 1, 2007 to July 31, 2008

Employment Rate Calculation:

Total Number of Graduates Placed¹

Divided by/

Total Graduates = Placement Rate

¹ Number of graduates employed in the field within one year of graduation

Plus (+)

The number of graduates who were both employed in the field within one year of graduation and continuing their education

Plus (+)

The number of graduates who were not employed in the field within one year of graduation but continued their education

Joint Review Committee on Education in Radiologic Technology (JRCERT)

The JRCERT is the only agency recognized by the United States Department of Education for the accreditation of traditional and distance delivery educational programs in radiography, radiation therapy, magnetic resonance, and medical dosimetry.

Employment Rate Calculation:

Job placement rate is defined as the number of students graduates employed in the radiologic sciences compared to the number of graduates actively seeking employment in the radiologic sciences.

State of Missouri

If the school provides students/graduates with organized and systematic assistance with finding employment, the school is required to disclose the placement rate and the reporting period annually during their recertification process.

Methodology: This placement rate is an adjusted percentage of graduates working in training related fields. For accredited institutions, this rate is calculated in accordance with the requirements of the accrediting commission. The reporting period may be a calendar year, fiscal year, or any other 12-month period for which documentation is available.

Reporting Period: July 1, 2009 to June 30, 2010
