

HLC Student Achievement Disclosures

Updated 12/01/2022

The Higher Learning Commission (Public Information (FDCR.A.10.070)) requires that institutions make available to students and the public accurate information regarding student achievement. Retention, completion, and post-graduation data is provided for Colorado Technical University students below. CTU programs are not designed to prepare students for particular state-level certification or licensing exams, therefore information about state licensure pass rates is not included.

Retention Rates

The following *retention rates* represent students that were active in the program as of the indicated quarter and were subsequently retained in or graduated from the program as of three quarters later (which represents one academic year). Students that are removed from the population due to not having proof of high school graduation or its equivalent on file are excluded from the data.

N/A = fewer than 10 students in cohort

- (1) A student is considered to be active if they possess a status of Active, Externship, Probation, Leave of Absence (LOA), Standard Period of Non-enrollment (SPN), or Pending Graduate.
- (2) The number of retained students includes those that were active in or have graduated from the program.

Completion Rates

The following *completion rate* tables reflect information for CTU full-time students that completed the program within 150% of the standard program length². Full time/part time status is determined based on credits attempted during the first term after entering their program and part time students are not included in the tables. CTU students include working adults, military members, and corporate partner employees, and may choose a part-time course schedule. Each cohort consists of all initial program entrants who are active past the first session add/drop period, met proof of graduation requirements by the required deadline, and enrolled during the 150% time period preceding the award year indicated in the chart below. An award year runs from July 1 to June 30. Students who transfer among programs are counted in the denominator for those programs, but only in the numerator of the program from which they graduate. Students who enrolled in a bachelor's program and withdrew with sufficient credit earned to be awarded an associate's degree are not counted as graduates for the purpose of these rates.

¹The program level retention rate is the percent of all students who were active (1) in the program as of sixteen (16) days after the start of the indicated quarter, and were subsequently retained (2) three quarters later at the same point of the quarter.

^{*}The CTU campuses at Colorado Springs and Denver South were closed in response to the COVID-19 pandemic. CTU does not have information about how these closures might have impacted individual students; therefore these rates may not be indicative of a typical student's experience and should not be relied on as an indication of what students can expect should they enroll at the University.

Median Earnings of CTU Graduates

Colorado Technical University (all locations)

According to the Department of Education's College Scorecard*, CTU students receiving Title IV funds that completed their programs in the following fields of study from July 1, 2014 to July 1, 2016 had *median earnings* two years after leaving the institution as indicated in the chart below. CTU students who did not utilize Title IV funds are not included in the data.

^{*}The CTU campuses at Colorado Springs and Denver South were closed in response to the COVID-19 pandemic. CTU does not have information about how these closures might have impacted individual students; therefore these rates may not be indicative of a typical student's experience and should not be relied on as an indication of what students can expect should they enroll at the University.

² The University had identified the standard program length for its programs, which is used as part of external data reporting. However, the actual program length can vary depending on the individual circumstances of each student including, but not limited to, the impact of transfer or proficiency credits earned or courses that are repeated.

³The University is not able to verify the accuracy of this information. This information should not be relied upon as an accurate indication of what your salary will be upon graduating from the program. CTU cannot guarantee employment, salary, or career advancement.

N/A = No data provided by the College Scorecard

^{*}The College Scorecard's median earnings are produced at the institutional level by credential level and 4 digit Classification of Instructional Programs (CIP) Code. The College Scorecard median earning values found within this document align to the CIP Code associated to the program for new enrollments.

Alumni Information

The University has partnered with an external agency, Hanover Research, to send surveys to CTU alumni with the goal of gaining insight into the career paths of CTU alumni after graduating. The information below was gathered in 2018, 2019, and 2021, with each survey polling graduates from three previous years. The 2018 survey received responses from 544 graduates from 2013, 520 graduates from 2015, and 915 graduates from 2017 for a total of 1,979 respondents (12% response rate). The 2019 survey received responses from 334 graduates from 2014, 280 respondents from 2016, and 347 graduates from 2018, for a total of 961 respondents (6% response rate). The 2021 survey received responses from 57 graduates from 2018, 85 graduates from 2019, and 104 graduates from 2020 for a total of 246 respondents (1% response rate). Only degree levels, areas, and programs with sufficient sample size (n>50 for 2018 and 2019, and n>10 for 2021) are included in the information below. All data is self-reported by CTU alumni. Due to the pandemic, a survey was not administered in 2020.

Information provided below is based on individual feedback and may not be representative of a typical student's experience.

2018

Alumni report positive career impacts since graduating from CTU. More than one-third of alumni have received a new job opportunity with a different employer, while about 2 in 10 alumni have received a promotion or new job opportunity with their current employer since graduation.

A greater number of alumni work in managerial positions after graduating from CTU compared to when they started their degree. The percentage of alumni working in entry-level positions decreases from 61 percent to 51 percent, while the percent working in manager, director, and executive level positions increased.

(1979 responses/12% response rate)

2019

Alumni report positive career changes since graduating from CTU. Twenty-nine percent have received a new job opportunity with a different employer, and 21 percent have received a promotion or new job opportunity with their current employer since graduation.

A greater percentage of alumni work in managerial positions after graduating from CTU compared to when they started their degree. The percentage of alumni working in entry-level positions decreased from 58 percent to 45 percent, while the percentage working in manager, director, and executive level positions increased.

(961 responses/6% response rate)

2021

Alumni report their current position levels have increased compared to when they started their degrees. Fewer alumni are in entry-level positions today than when they started their degrees at CTU. Alumni report positive career changes since graduating from CTU. About one-quarter of alumni have received a new job opportunity with a different employer. And nearly one quarter have received a promotion or new job opportunity with their current employer.
